

# VOYAGER

ELECTRIC VEHICLES

# AN ADVENTURE LIKE NO OTHER

The team at Voyager Electric Vehicles is quickly building a reputation for doing things different. You might even call it “reverse engineering the golf cart industry.” That’s because for this team of solution-minded entrepreneurs, breaking the rules of how it’s always been done is how they roll – literally.

“Voyager EV is different because we started with the end in mind,” explains Andy Ilg, Chief Operating Officer and Lead Engineer. “It’s like reverse engineering but for an entire industry.”

The Voyager EV brand reflects the team’s unwavering belief in defying the status quo and pursuing what others call impossible. Their four high-performing lithium-powered models – the Patriot, Pioneer, Explorer, and Rebel – were specifically designed to create a lineup of electric vehicles that meet the needs of a wide variety of consumers.

The entire Voyager EV team is passionate about bringing a rocket-scientist-approved electric vehicle into the industry. But even more so, they are passionate about providing unparalleled support to their quickly growing dealer network. Because that, they believe, will raise the standards for the entire industry and change the game for good.

With the team’s dedication and experience, plus their electric vehicles’ performance and position in the market, they are clearly on the path to a successful adventure. Or as they like to say, ‘an adventure like no other!’ Built in America, by Americans.

Join the adventure. Drive Voyager Electric Vehicles.

# DEALERS-FIRST APPROACH

"Our goal is to support our dealers in a first-class way," says Jeff, Chief Executive Officer and Head of Sales & Client Relations. "We know that when we help enough others win, we will eventually win too."

They call it their Dealers-First Approach. It's more than just a loose agreement; it's a firm commitment with their dealers that they've got their back - in the form of Two-Year Warranty coverage including parts and labor, a full stock of replacement parts if needed, engineering expertise to help troubleshoot any repairs, sales and marketing resources, designated account managers, and more.

"We are hyper-focused on creating win-wins with our growing dealer network," says Lucas Hathaway, President of Voyager EV. "This is a long game for us, and we want everyone to see that from our very first handshake."

The entire Voyager team is passionate about bringing a rocket-scientist-approved electric vehicle into the industry. But even more so, they are passionate about providing unparalleled support to their quickly growing dealer network. Because that, they believe, will raise the standards for the entire industry and change the game for good.
